

USABILITY MAPPING

The science of safety

A 90 Minute Webinar

Safety and Documentation Cannot be Separated!

Did
you
Know?

- Technical writing practices can compromise user safety
- Emotions of the moment impact operational behaviour (not logic or language)
- Solutions crafted by expert opinions must still yield to the laws of human cognition and behaviour

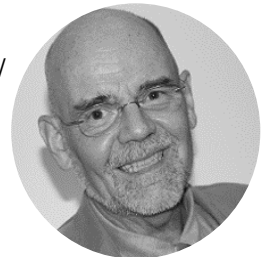

Come
and
Find out!

- How to measurably reduce user comprehension errors by applying Usability Engineering techniques
- What user testing showed us that we never expected
- How applied psychology measurably reduces the risk of user performance errors
- How to make documents safer to use

Vision: Let us envision the day when no operator anywhere in the world has to perform a procedure that does not follow the principles of human cognition and behavior.

Researched and presented by:

Klaus Hofer, Ph.D. CEO and Chief Scientist at CAT-i

UX Usability Mapping Webinar
